## New gTLD Program
## Community Priority Evaluation Report
Report Date: 11 June 2014

| | |
|---|---|
| Application ID: | 1-880-35508 |
| Applied-for String: | LLP |
| Applicant Name: | Dot Registry LLC |

### Overall Community Priority Evaluation Summary

| Community Priority Evaluation Result | Did Not Prevail |
|---|---|

Thank you for your participation in the New gTLD Program. After careful consideration and extensive review of the information provided in your application, including documents of support, the Community Priority Evaluation panel determined that the application did not meet the requirements specified in the Applicant Guidebook. Your application did not prevail in Community Priority Evaluation.

Your application may still resolve string contention through the other methods as described in Module 4 of the Applicant Guidebook.

### Panel Summary

**Overall Scoring**     **5 Point(s)**

| Criteria | Earned | Achievable |
|---|---|---|
| #1: Community Establishment | 0 | 4 |
| #2: Nexus between Proposed String and Community | 0 | 4 |
| #3: Registration Policies | 3 | 4 |
| #4: Community Endorsement | 2 | 4 |
| Total | 5 | 16 |

**Minimum Required Total Score to Pass 14**

| Criterion #1: Community Establishment | 0/4 Point(s) |
|---|---|
| 1-A Delineation | *0/2 Point(s)* |

The Community Priority Evaluation panel determined that the community as identified in the application did not meet the criterion for Delineation as specified in section 4.2.3 (Community Priority Evaluation Criteria) of the Applicant Guidebook, as the community demonstrates insufficient delineation, organization and pre-existence. The application received a score of 0 out of 2 points under criterion 1-A: Delineation.

Delineation
Two conditions must be met to fulfill the requirements for delineation: there must be a clear straightforward membership definition and there must be awareness and recognition of a community (as defined by the applicant) among its members.

The community defined in the application ("LLP") is:

> Members of the community are defined as businesses registered as Limited Liability Partnerships with the United States or its territories. Limited Liability Partnerships or (LLP's) as they are commonly abbreviated, are specifically designed to represent professional service businesses in the US . Limited Liability Partnerships are commonly adopted by businesses which focus on: accounting, attorneys, architects, dentists, doctors and other fields treated as professionals under each state's law….

> A Limited Liability Partnership is defined as a partnership in which some or all partners (depending on jurisdiction) have limited liability. LLP's therefore exhibit qualities of both partnerships and corporations. In an LLP, one partner is not responsible or liable for another partner's misconduct or negligence. This distinction is why the LLP is a popular business entity amongst accountants, doctors, and lawyers; which deal heavily with issues that could inspire mal-practice lawsuits.

This community definition shows a clear and straightforward membership. While broad, the community is clearly defined, as membership requires formal registration as a limited liability partnership with the relevant US state (LLPs operate in about 40 US states). In addition, limited liability partnerships must comply with US state law and show proof of best practice in commercial dealings to the relevant state authorities.

However, the community as defined in the application does not have awareness and recognition of a community among its members. This is because limited liability partnerships operate in vastly different sectors, which sometimes have little or no association with one another.  Research showed that firms are typically organized around specific industries, locales, and other criteria not related to the entities structure as an LLP. Based on the Panel's research, there is no evidence of LLPs from different sectors acting as a community as defined by the Applicant Guidebook. There is no evidence that these limited liability partnerships would associate themselves with being part of the community as defined by the applicant.

The Community Priority Evaluation panel determined that the community as defined in the application only satisfies one of the two conditions to fulfill the requirements for delineation.

Organization
Two conditions must be met to fulfill the requirements for organization: there must be at least one entity mainly dedicated to the community and there must be documented evidence of community activities.

The community as defined in the application does not have at least one entity mainly dedicated to the community. Although responsibility for corporate registrations and the regulations pertaining to corporate formation are vested in each individual US state, these government agencies are fulfilling a function, rather than representing the community. In addition, the offices of the Secretaries of State of US states are not mainly dedicated to the community as they have other roles/functions beyond processing corporate registrations. According to the application:

> Limited Liability Partnerships can be formed through all but ten states in the United States. Therefore members of this community exist in close to forty US states. LLP formation guidelines are dictated by state law and can vary based on each state's regulations. Persons form an LLP by filing required documents with the appropriate state authority, usually the Secretary of State.

The community as defined in the application does not have documented evidence of community activities. As there is no entity that is mainly dedicated to the community as defined in the .LLP application, there is no documented evidence of community activities.

The Community Priority Evaluation panel determined that the community as defined in the application does not satisfy either of the two conditions to fulfill the requirements for organization.

Pre-existence
To fulfill the requirements for pre-existence, the community must have been active prior to September 2007 (when the new gTLD policy recommendations were completed).

The community as defined in the application was not active prior to September 2007. According to section 4.2.3 (Community Priority Evaluation Criteria) of the Applicant Guidebook the CPE process is conceived to identify qualified community-based applications, while preventing both "false positives" (awarding undue priority to an application that refers to a "community" construed merely to a get a sought-after generic word as a gTLD string) and "false negatives" (not awarding priority to a qualified community application). ). The Community Priority Evaluation panel determined that this application refers to a "community" construed to obtain a sought-after corporate identifier as a gTLD string, as these limited liability partnerships would typically not associate themselves with being part of the community as defined by the applicant. The community therefore could not have been active prior to the above date (although its constituent parts were active)..

The Community Priority Evaluation panel determined that the community as defined in the application does not fulfill the requirements for pre-existence.

| 1-B Extension | *0/2 Point(s)* |
|---|---|

The Community Priority Evaluation panel determined that the community as identified in the application did not meet the criterion for Extension specified in section 4.2.3 (Community Priority Evaluation Criteria) of the Applicant Guidebook, as the application did not demonstrate considerable size or longevity for the community. The application received a score of 0 out of 2 points under criterion 1-B: Extension.

Size
Two conditions must be met to fulfill the requirements for size: the community must be of considerable size and must display an awareness and recognition of a community among its members.

The community as defined in the application is of a considerable size. The community for .LLP as defined in the application is large in terms of number of members. According to the application, "LLP's represent a small but prestigious sector of business in the United States."

However, as previously stated, the community as defined in the application does not have awareness and recognition of a community among its members. This is because limited liability partnerships operate in vastly different sectors, which sometimes have little or no association with one another. Research showed that firms are typically organized around specific industries, locales, and other criteria not related to the entities structure as an LLP. Based on the Panel's research, there is no evidence of LLPs from different sectors acting as a community as defined by the Applicant Guidebook. These limited liability partnerships would therefore not typically associate themselves with being part of the community as defined by the applicant.

The Community Priority Evaluation panel determined that the community as defined in the application only satisfies one of the two conditions to fulfill the requirements for size.

Longevity
Two conditions must be met to fulfill the requirements for longevity: the community must demonstrate longevity and must display an awareness and recognition of a community among its members.

The community as defined in the application does not demonstrate longevity. As mentioned previously, according to section 4.2.3 (Community Priority Evaluation Criteria) of the Applicant Guidebook the CPE process is conceived to identify qualified community-based applications, while preventing both "false positives" (awarding undue priority to an application that refers to a "community" construed merely to a get a sought-after generic word as a gTLD string) and "false negatives" (not awarding priority to a qualified community application). The Community Priority Evaluation panel determined that this application refers to

a "community" construed to obtain a sought-after corporate identifier as a gTLD string, as these limited liability partnerships would typically not associate themselves with being part of the community as defined by the applicant. Therefore, the pursuits of the .LLP community are not of a lasting, non-transient nature.

Additionally, as previously stated, the community as defined in the application does not have awareness and recognition of a community among its members. This is because limited liability partnerships operate in vastly different sectors, which sometimes have little or no association with one another. Research showed that firms are typically organized around specific industries, locales, and other criteria not related to the entities structure as an LLP. Based on the Panel's research, there is no evidence of LLPs from different sectors acting as a community as defined by the Applicant Guidebook. These limited liability partnerships would therefore not typically associate themselves with being part of the community as defined by the applicant.

The Community Priority Evaluation panel determined that the community as defined in the application does not satisfy either of the two conditions to fulfill the requirements for longevity.

| Criterion #2: Nexus between Proposed String and Community | 0/4 Point(s) |
|---|---|
| 2-A Nexus | *0/3 Point(s)* |

The Community Priority Evaluation panel determined that the application did not meet the criterion for Nexus as specified in section 4.2.3 (Community Priority Evaluation Criteria) of the Applicant Guidebook. The string identifies the community, but over-reaches substantially beyond the community. The application received a score of 0 out of 3 points under criterion 2-A: Nexus.

To receive the maximum score for Nexus, the applied-for string must match the name of the community or be a well-known short-form or abbreviation of the community name. To receive a partial score for Nexus, the applied-for string must identify the community. "Identify" means that the applied-for string should closely describe the community or the community members, without over-reaching substantially beyond the community.

The applied-for string (.LLP) over-reaches substantially, as the string indicates a wider or related community of which the applicant is a part but is not specific to the applicant's community. According to the application documentation:

> ".LLP" was chosen as our gTLD string because it is the commonly used abbreviation for the entity type that makes up the membership of our community. In the English language Limited Liability Partnership is primarily shortened to LLP when used to delineate business entity types…

> LLP is a recognized abbreviation in all 50 states and US territories denoting the registration type of a business entity. Our research indicates that LLP as corporate identifier is used in eleven other jurisdictions (Canada, China, Germany, Greece, India, Japan, Kazakhstan, Poland, Romania, Singapore, and the United Kingdom) though their formation regulations are different from the United States and their entity designations would not fall within the boundaries of our community definition.

While the string identifies the name of the community, it captures a wider geographical remit than the community has, as the corporate identifier is used in Poland, the UK, Canada and Japan, amongst others. Therefore, there is a substantial over-reach between the proposed string and community as defined by the applicant.

The Community Priority Evaluation panel determined that the applied-for string over-reaches substantially beyond the community. It therefore does not meet the requirements for Nexus.

| 2-B Uniqueness | *0 / 1 Point(s)* |
|---|---|

The Community Priority Evaluation panel determined that the application did not meet the criterion for Uniqueness as specified in section 4.2.3 (Community Priority Evaluation Criteria) of the Applicant Guidebook as the string does not score a 2 or a 3 on Nexus. The application received a score of 0 out of 1 point under criterion 2-B: Uniqueness.

To fulfill the requirements for Uniqueness, the string must have no other significant meaning beyond identifying the community described in the application and it must also score a 2 or a 3 on Nexus. The string as defined in the application does not demonstrate uniqueness as the string does not score a 2 or a 3 on Nexus and is therefore ineligible for a score of 1 for Uniqueness. The Community Priority Evaluation panel determined that the applied-for string does not satisfy the condition to fulfill the requirements for Uniqueness.

| **Criterion #3: Registration Policies** | **3/4 Point(s)** |
|---|---|
| 3-A Eligibility | *1 / 1 Point(s)* |

The Community Priority Evaluation panel determined that the application met the criterion for Eligibility as specified in section 4.2.3 (Community Priority Evaluation Criteria) of the Applicant Guidebook as eligibility is restricted to community members. The application received a maximum score of 1 point under criterion 3-A: Eligibility.

To fulfill the requirements for Eligibility, the registration policies must restrict the eligibility of prospective registrants to community members. The application demonstrates adherence to this requirement by limiting eligibility to registered limited liability partnerships and by cross-referencing their documentation against the applicable US state's registration records in order to verify the accuracy of their application. (Comprehensive details are provided in Section 20e of the applicant documentation). The Community Priority Evaluation panel determined that the application satisfies the condition to fulfill the requirements for Eligibility.

| 3-B Name Selection | *1 / 1 Point(s)* |
|---|---|

The Community Priority Evaluation panel determined that the application met the criterion for Name Selection as specified in section 4.2.3 (Community Priority Evaluation Criteria) of the Applicant Guidebook as name selection rules are consistent with the articulated community-based purpose of the applied-for TLD. The application received a maximum score of 1 point under criterion 3-B: Name Selection.

To fulfill the requirements for Name Selection, the registration policies for name selection for registrants must be consistent with the articulated community-based purpose of the applied-for gTLD. The application demonstrates adherence to this requirement by outlining a comprehensive list of name selection rules, such as requirements that second level domain names should match or include a substantial part of the registrant's legal name, and specifying that registrants will not be able to register product line registrations, amongst other requirements. (Comprehensive details are provided in Section 20e of the applicant documentation). The Community Priority Evaluation panel determined that the application satisfies the condition to fulfill the requirements for Name Selection.

| 3-C Content and Use | *1 / 1 Point(s)* |
|---|---|

The Community Priority Evaluation panel determined that the application met the criterion for Content and Use as specified in section 4.2.3 (Community Priority Evaluation Criteria) of the Applicant Guidebook as the rules for content and use are consistent with the articulated community-based purpose of the applied-for TLD. The application received a maximum score of 1 point under criterion 3-C: Content and Use.

To fulfill the requirements for Content and Use, the registration policies must include rules for content and use for registrants that are consistent with the articulated community-based purpose of the applied-for gTLD. The application demonstrates adherence to this requirement by noting that all registrants must adhere to the content restrictions outlined in the applicant's abuse policies. (Comprehensive details are provided in Section 20e of the applicant documentation). The Community Priority Evaluation panel determined that the application satisfies the condition to fulfill the requirements for Content and Use.

| 3-D Enforcement | *0/1 Point(s)* |
|---|---|

The Community Priority Evaluation panel determined that the application did not meet the criterion for Enforcement as specified in section 4.2.3 (Community Priority Evaluation Criteria) of the Applicant Guidebook as the application provided specific enforcement measures but did not include appropriate appeal mechanisms. The application received a score of 0 out of 1 point under criterion 3-D: Enforcement.

Two conditions must be met to fulfill the requirements for Enforcement: the registration policies must include specific enforcement measures constituting a coherent set, and there must be appropriate appeals mechanisms. The applicant outlined policies that include specific enforcement measures constituting a coherent set. For example, it a registrant wrongfully applied for and was awarded a second level domain name, the right to hold this domain name will be immediately forfeited. (Comprehensive details are provided in Section 20e of the applicant documentation). However, the application did not outline an appeals process. The Community Priority Evaluation panel determined that the application satisfies only one of the two conditions to fulfill the requirements for Enforcement.

| **Criterion #4: Community Endorsement** | **2/4 Point(s)** |
|---|---|
| 4-A Support | *1/2 Point(s)* |

The Community Priority Evaluation panel determined that the application partially met the criterion for Support specified in section 4.2.3 (Community Priority Evaluation Criteria) of the Applicant Guidebook as there was documented support from at least one group with relevance. The application received a score of 1 out of 2 points under criterion 4-A: Support.

To receive the maximum score for Support, the applicant is, or has documented support from, the recognized community institution(s)/member organization(s), or has otherwise documented authority to represent the community. "Recognized" means the institution(s)/organization(s) that, through membership or otherwise, are clearly recognized by the community members as representative of the community. To receive a partial score for Support, the applicant must have documented support from at least one group with relevance. "Relevance" refers to the communities explicitly and implicitly addressed.

The Community Priority Evaluation panel determined that the applicant was not the recognized community institution(s)/member organization(s), nor did it have documented authority to represent the community, or documented support from a majority of the recognized community institution(s)/member organization(s). However, the applicant possesses documented support from at least one group with relevance and this documentation contained a description of the process and rationale used in arriving at the expression of support.

The application included letters from a number of Secretaries of State of US states, which were considered to constitute support from groups with relevance, as each Secretary of State has responsibility for corporate registrations and the regulations pertaining to corporate formation in its jurisdiction. These entities are not the recognized community institution(s)/member organization(s), as these government agencies are fulfilling a function, rather than representing the community. The viewpoints expressed in these letters were not consistent across states. While several US states expressed clear support for the applicant during the Letters of Support verification process, others either provided qualified support, refrained from endorsing one

particular applicant over another, or did not respond to the verification request. Letters of support from other entities did not meet the requirement for relevance based on the Applicant Guidebook criteria, as they were not from the recognized community institutions/member organizations. The Community Priority Evaluation Panel determined that the applicant partially satisfies the requirements for Support.

| 4-B Opposition | *1/2 Point(s)* |
|---|---|

The Community Priority Evaluation panel determined that the application partially met the criterion for Opposition specified in section 4.2.3 (Community Priority Evaluation Criteria) of the Applicant Guidebook, as the application received relevant opposition from one group of non-negligible size. The application received a score of 1 out of 2 points under criterion 4-B: Opposition.

To receive the maximum score for Opposition, the application must not have received any opposition of relevance. To receive a partial score for Opposition, the application must have received opposition from, at most, one group of non-negligible size.

The application received several letters of opposition, one of which was determined to be relevant opposition from an organization of non-negligible size. This opposition was from a community that was not identified in the application but which has an association to the applied-for string. Opposition was on the grounds that limiting registration to US registered corporations only would unfairly exclude non-US businesses. The remaining letters were either from groups/individuals of negligible size, or were not from communities which were not mentioned in the application but which have an association to the applied for string. The Community Priority Evaluation Panel determined that the applicant partially satisfied the requirements for Opposition.

**Disclaimer:** Please note that these Community Priority Evaluation results do not necessarily determine the final result of the application. In limited cases the results might be subject to change. These results do not constitute a waiver or amendment of any provision of the Applicant Guidebook or the Registry Agreement. For updated application status and complete details on the program, please refer to the Applicant Guidebook and the ICANN New gTLDs microsite at <newgtlds.icann.org>.
